

Dear Postal Regulatory Commission Members,

Remove DeJoy from his post immediately. For the past year his main goal has been to decommission our post office in order to put money in his pocket (UPS) and to interfere with the People's right to a free and fair election. A seditionist act. In addition, as if these two items are not reason enough for his immediate dismissal, his ten year plan will increase postage rates, slow down the mail even more, modify first class mail delivery services which interferes with the safe and efficient delivery of ballots, medications, and other important items that Americans expect in a timely manner through the USPS and NOT some private stockholders wet dream like UPS, he will cause the largest rollback of consumer mail services in a generation, and finally mailing industry officials warn that substantial service cuts could drive away business and worsen the post office's already battered finances.

The US post office is protected under the US constitution. We the People voted in Joe Biden, flipped the Senate and the House to get away from the corrupt, seditionist intentions that people like DeJoy and others have been using to destroy our nation. Now I hear that you and your fellow members plan on jumping on the DeJoy train and planning on supporting his crap initiatives to further destroy a beloved and well used American institution. From your actions, or in this case your inactions, the American people can and will assume that you too are for the support of destruction of our US post office and sympathetic to the sedition that DeJoy and other Trump administration officials bring to the table. Are you prepared to shame yourself in such ways in order to let down your country and your people? I guess your next choice regarding DeJoy will let us know.
